

CTE Introduction Brochure Lesson Plan Option #2

Time Frame: 1 class period

Summary: Students will explore the new CTE Introduction Brochure: **Planning For the Future by Exploring in CTE Intro Today.**

Main Curriculum Tie: Career and Technical Education Introduction

Materials: Beach ball, labels

Background for Teachers: Read and review the new CTE Introduction brochure.

Preparation: Copy labels with questions on them and place labels randomly on the beach ball. A sample is provided for teacher use. Other questions can be created.

Intended Learning Outcomes: By reading the brochure students will become familiar with the facts and information about why there is a required CTE Intro program. Details of the program, why it is beneficial for students, how it can help students identify their interests and make wise choices for their future are included in the brochure.

Instructional Procedures: Have students read the brochure. Throw the ball into the classroom. When someone catches it, have them answer the question that their thumb is on.

Strategies for Diverse Learners: Divide the class into small groups. Have different groups read different sections of the brochure. Toss the ball within the small groups. (Separate balls would need to be prepared for the small groups with the questions from that one section of the brochure.) Then rotate the balls to another group so they can share all of the information in the brochure.

Assessment Plan: Send the brochure home with the student to be shared with parents. Have a form for parents to sign that they have read the brochure and/or talked with their child about the program.

Created Date: August 18, 2008

KEY

1. What does CTE in the title of the name of the class CTE Introduction stand for? **Career and Technical Education**
